JOHAN SUSTAINABILITY POLICY

Johan Holdings Berhad (“Johan”) Sustainability Policy (“JSP” or “Policy”) demonstrates our commitment to embody sustainable business practices wholeheartedly. The vision of Johan Group (“Group”) is for this Policy to benefit all stakeholders and empower them to achieve their own goals. Johan intends to accomplish this by collaborating with our trusted employees, suppliers and vendors, and business and community partners, i.e., our stakeholders in order to create shared value that satisfies the current generation’s needs without compromising that of the future.

The Group JSP is a guidance for all our stakeholders, and they are required to abide by the Policy and are provided with opportunities and tools for actively enacting the Policy. The JSP can be accessed on the Johan’s website and disseminated in languages understood by our stakeholders.

OUR COMMITMENTS

The JSP consists of 4 Economic, Environment, Social and Governance (“ESG”) pillars that address the impacts of our business operations. The Group maintains an uncompromising stance that allows us to deliver shared ESG practices and values. Enumerated below are the initiatives we have implemented to realise our commitment to sustainable development.

Compliance

- Aspire for a more significant impact beyond regulatory compliance with all Environmental, Health and Safety, Human Rights, and Labour laws and regulations.
- Commit to the international standards and guidelines, applicable to our business and organisation.
- Allocate tools for monitoring our stakeholders’ compliance with the JSP and other pertinent laws and regulations.

Environmental Commitment

Our environmental commitment encompasses the protection of all aspects of the earth’s environment: air, soil, water and the atmosphere. In this light, we deliver on our commitment by:

- Establishing an effective environmental management system and continually implementing improvement initiatives.
- Setting environmental performance targets and conducting periodic reviews.
- Ensuring the participation of interested and impacted stakeholders through frequent collaborations and training.
- Supporting the government’s national policies on climate change, biodiversity and other agenda relating to environmental protection.
- Adopting international principles in protecting the ecosystem.
- Putting in place initiatives that will adapt our operations and mitigate any negative impacts associated with climate change, biodiversity, water and natural resources.
- Allocating resources and creating collaborative opportunities to improve efficiencies, such as practicing 3Rs (reduce, reuse and recycle) and making eco-friendly products, to reduce our consumption of energy, water and natural resources.
- Managing and assessing our risks and opportunities to minimise or even completely eliminate water, ground and air pollution.
